

AvarSYS and Fusion Petroleum Technologies Partner to Deliver Advanced Visualization Solutions for the Oil and Gas Industries

April 20, 2008 Atlanta, GA

AvarSYS, Inc. and Fusion Petroleum Technologies, Inc. today announced a partnership to deliver advanced visualization systems and software solutions that improve the ability of oil and gas companies to find and exploit new oil fields quickly and efficiently.

Fusion Petroleum Technologies Inc. is a recognized leader in providing expertise in geophysics, geology, and reservoir engineering. The Fusion software platform LAGNIAPPE™ provides an integrated environment for the processing and analysis of seismic data for petroleum exploration and production. The platform which is XML-based and operates in the LINUX OS includes full parallelization for LINUX™ clusters and a 21st century visualization package called AMIGO™. "Fusion has a long track record in providing integrated solutions that create maximum value for our clients and meet their most demanding challenges", said Dr. Alan Huffman, President and Chief Executive Officer of Fusion Petroleum Technologies, Inc. "Our partnership with AvarSYS extends our solution capability by providing an integrated Linux cluster (AV-1 supercomputing) solution that enables our clients to accelerate oil and gas exploration with greater precision and more cost effectively by delivering unmatched real-time computational and visualization processing".

AvarSYS has a long history of delivering cost effective high performance computers to the engineering, scientific, aerospace and government markets. "We are very excited to have the opportunity to partner with Fusion Petroleum Technologies Inc. in this critical market segment," stated Todd Bone, Chief Executive Officer of AvarSYS, Inc. "Energy is a global issue today and we are proud to be able to work with Fusion's experts and provide part of the technology that helps their customers accelerate oil and gas exploration projects".

About Fusion Petroleum Technologies, Inc.

Fusion Petroleum Technologies Inc. is a leading provider of integrated geophysical and geological solutions for the most challenging exploration and production problems facing the petroleum industry. Fusion has over 225 clients worldwide including super-major, major and independent petroleum producers and a large number of National Oil Companies. Fusion provides integrated services, software solutions and training for clients in over 40 countries worldwide. The company has offices in Houston, Texas, Norman, Oklahoma, Boulder, Colorado and Tripoli, Libya. Fusion partner companies in Kuwait, Canada, Brazil, and China also provide Fusion technology and expertise to clients in each of these regions.
