

## **Fusion Announces Release of New Reflection Statics Software**

**April 20, 2008 Houston, TX**

**Fusion Petroleum Technologies Inc.** announced today the roll out of a new reflection statics package called **StatCORR™** that will provide improved statics solutions for the processing of seismic data for petroleum exploration and production. The new software will be offered as an additional module in Fusion's leading-edge **Seismic Studio™** toolkit and also as an integrated module in the **LAGNIAPPE™** processing platform. The reflection statics module, when combined with the **Seismic Studio™** and **Cimarron™** software packages, will sustain Fusion's position as the world leader in the field of statics and geometry correction.

"Fusion has been working toward the vision of an integrated platform for all of our proprietary software," said Dr. Alan R. Huffman, President & CEO of Fusion. "**StatCORR™** will extend the range of statics solutions that Fusion provides to our clients. We believe that the addition of new **StatCORR™** module will improve the way that geoscientists work, and we are excited about delivering this value-adding solution to our clients worldwide."
